

In the Claims:

1.(Currently Amended) A resin composition ~~suitable for processing into a biaxially oriented polypropylene film, the composition~~ consisting essentially of:

about 70% to about 95% by weight of a polypropylene homopolymer, said polypropylene homopolymer having less than 3% by weight xylene solubles and a crystallinity of at least 55%; and

about 5% to about 30% by weight of an ethylene/propylene random copolymer, said ethylene/propylene random copolymer containing from about 0.5% to about 7.0% ethylene by weight.

2.(Canceled)

3.(Currently Amended) The resin composition according to claim 1, wherein said resin composition is produced by in reactor blending.

4.(Previously Presented)The resin composition according to claim 1, wherein the composition contains at least one additive selected from the group consisting of: nucleators, anti-oxidants, acid neutralizers, slip agents, antiblock, antifogging agents and pigments.

5.(Currently Amended) ~~The A~~ resin composition ~~according to claim 1, wherein said composition consists~~ consisting essentially of:

about 70% to about 85% of a polypropylene homopolymer having less than 3% by weight xylene solubles[,] and a crystallinity of at least 55%; and

about 15% to about 30% by weight of an ethylene/propylene random copolymer, said ethylene/propylene random copolymer containing from about 0.5% to about 7.0% ethylene by weight.

6.(New) The resin composition according to claim 5, wherein said resin composition is produced by in reactor blending.
